

CENTRAL LYON COUNTY VECTOR CONTROL DISTRICT
MEETING MINUTES. June 13, 2023

The meeting was called to order at 5:30 pm.

Members present: Toni Anderson, Mary Smith, Jerry Culwell, Terry Anderson and Tyler Minor.

Tim Plants, Integrity Pest Management, also present.

Minutes of June 13, 2023 were approved without change.

Tim reported on the status of the river, Black Flies and the light traps. He also told us we are going have a real problem with larvaciding this year.

Tim did a fly -over of the river a few days ago and had a show-and-tell presentation. The river is at it's highest since tracking began. There are thousands of acre feet under water and water flow is so fast that chemicals will only be lost.

Toni told the Board that a one -year contract had been signed with Morris Ag Air to provide aerial treatments when needed.

Hopefully, Frey will be back in the air and available to us soon.

Last meeting of this season was not brought up due to the extreme problems were having.

There have been a few calls re mosquitoes and gnats, but people have been understanding of the critical problems this year and thanked us for our efforts.

There being no further business, the meeting was adjourned at 5:50pm.

Approved: 07/11/2023
