RIGHT TO FARM DISCLOSURE

Pursuant to Chapter 15.20 of the Lyon County Code:

As a condition of approval of any subdivision or parcel map of any land in Lyon County, the owners or developers of such land and their heirs, assigns and successors, shall agree to provide notice to any and all subsequent purchasers of the provisions of Nevada Revised Statutes 40.140 and this chapter. Such notice shall include a signed acknowledgment on all land development maps. No public official, board, commission, or agency of the county shall issue a permit, lease, license, certificate, or other entitlement for use of a parcel which is adjacent to or near agricultural land and other land until the owner(s) of the property has signed a written disclosure statement acknowledging that they are aware of the "right to farm" policy of the county and have been provided with a copy of a statement containing substantially the disclosure set forth in this chapter.

15.20.04 Disclosure Statement:

Lyon County has determined that the highest and best use for agricultural land as defined below is to develop or preserve said lands for the purposes of agricultural operations and it will not consider the inconveniences or discomforts arising from or related to agricultural operations to be a perceived nuisance if such operations are legal, consistent with accepted customs and standards and operated in a non-negligent manner.

If property you own or may purchase in the future is located adjacent, near, or close to agricultural lands or within agricultural lands, including agriculture land easements, irrigation ditch easements, drain ditch easements, or agricultural products processing facilities, you may be subject to inconveniences or discomfort arising from agricultural operations. These may include but are not limited to the spraying, cleaning, and maintenance of irrigation water delivery systems as well as traffic, noise, odors, dust, chemicals, smoke, insects, operation of machinery (during any 24-hour period), aircraft operation, and storage and disposal of agriculture by-products, including manure. One or more of the inconveniences described above may occur even in the case of an agricultural operation, which is in conformance with existing laws and regulations and locally accepted customs and standards. If you live near an agricultural production area and/or agriculture products facility, you should be prepared to accept such inconveniences or discomfort as a normal and necessary aspect of living in a County with a strong rural character and a healthy agricultural sector. You are prohibited from interfering with or in any way obstructing agricultural operations, including, for example, tampering with irrigation delivery facilities, obstructing irrigation ditches, and obstructing agricultural land easements.

For purposes of this notification:

While not presently zoned or designated on the General Plan for primary or substantial agricultural use, the land contains an existing agricultural operation of a type that would be obvious to an uninformed observer after a physical inspection of the property, and that operation began at a time when such use was permissible.

"Agricultural Operation" means all operations necessary to conduct agriculture as defined in Section 15.01.11 of the Lyon County Code, as such may be amended from time to time and shall include, but not be limited to, the cultivation and tillage of the soil, lawful use of appropriated water rights for agricultural irrigation purposes as well as any agriculture irrigation water delivery system maintenance and improvements, the burning of agricultural waste, weeds and other debris or other agricultural burning, including ditches and fields, lawful use of housing and transportation of labor for the purpose of crop production, protection of crops and livestock from pests (i.e., insects, diseases, weeds, predators) damaging or which could potentially damage crops or livestock, the proper and lawful use of agricultural chemicals, including but not limited to the ground and aerial (i.e., via aircraft) application of crop protection products and fertilizers, fumigation, or the raising, production, irrigation, pruning, harvesting, or processing of any living organism having value as an agricultural commodity or product, and any commercial practices performed incident to or in conjunction with such operations where the agricultural product is being produced, including preparation for market, delivery to storage, processing and packaging, and distribution to market, or to carriers for transportation to market or processing of an agricultural commodity, and those buildings or related facilities (no matter their zoning) that process, store, package and distribute agriculture products.
